123ContactForm makes it simple for academics from over 30 countries to register for leading global conference on advanced learning techniques.

Customer

Politehnica University of Timișoara

Segment: Event Registration

Vertical: Higher Education

Target: Colleges and Universities

Project: Academic conference registration

Benefits & Results: Seamless registration and payment for international academic conference

Contact: Silviu Vert

Summary

Founded in 1920, Politehnica University of Timișoara is the largest technical university in western Romania. It was established to educate more engineers in Romania as European states were being redefined following World War I. Now globally recognized for advanced research and education, the University continues a long tradition of scholarship in Romania by hosting international academic conferences such as the 17th IEEE International Conference on Advanced Learning Technologies (ICALT2017).

Issue

The 17th IEEE International Conference on Advanced Learning Technologies (ICALT2017), organized by the IEEE Computer Society and IEEE Technical Committee on Learning Technology, will be held at Politehnica University of Timișoara in Timișoara, Romania, from July 3–7, 2017. Having been held in more than 13 countries in its history, the event is a leading global technical conference that presents cutting-edge information on using technology to enhance learning for students of all ages.

In preparation for the conference, the university needed a quick and reliable way to register attendees from around the world for the event. It had to be easy for attendees from any country to use the registration form and pay the appropriate conference registration fees using Romcard, the Romanian payment solution chosen for the event.

Objectives

To make sure the conference would go smoothly, the university needed a comprehensive event registration solution that would:

- Accept registrations from around the world
- Securely handle registration payments with Romcard
- Maintain accurate records of attendees
- Facilitate smooth check-in during the conference
- Offer responsive support if anything went wrong

Solution

The University worked with 123ContactForm to develop a simple yet powerful registration form for the conference. Building on top of its core event registration capabilities, 123ContactForm developed a function to track a custom identification number provided by the Romcard payment solution to confirm registration payment. This allowed the university to easily accept and track payments using the required method.

After registering for the conference, attendees received confirmation emails of their registration and an invoice for registration fees. The separate invoice enabled attendees to coordinate repayment of conference registration fees through their academic offices.

Silviu Vert

Assistant Professor at Politehnica University of Timișoara

"The best registration forms are the ones that are so easy to use that you don't even notice how they work."

"So far, we have received no comments on the form from our attendees and everyone has been able to register very smoothly."

"We appreciate 123ContactForm's ability to deliver a complete and effective registration solution so we can focus on our conference."

Overall Payoff

Thanks to the streamlined yet capable registration form, attendees from more than thirty countries had no trouble registering for the conference and paying their registration fees, ensuring that there will be a truly global exchange of cutting-edge ideas at the event.

Because the registration form seamlessly compiled relevant data about attendees, conference participants will also be able to count on a painless check-in experience when they arrive at Politehnica University of Timișoara for the conference in July.

About the Client

Politehnica University of Timisoara is the largest technical university in western Romania. Established in 1920, shortly after the union of Romanian territories, in a European context marked by the redefinition of states and the aftermath of World War I, the school looked to train engineers in Romania.

Now a university of advanced research and education, Politehnica University of Timișoara is today nationally and internationally recognized for its leading instructors and prestigious academics.

☐ I am NOT an author (Late Registration)

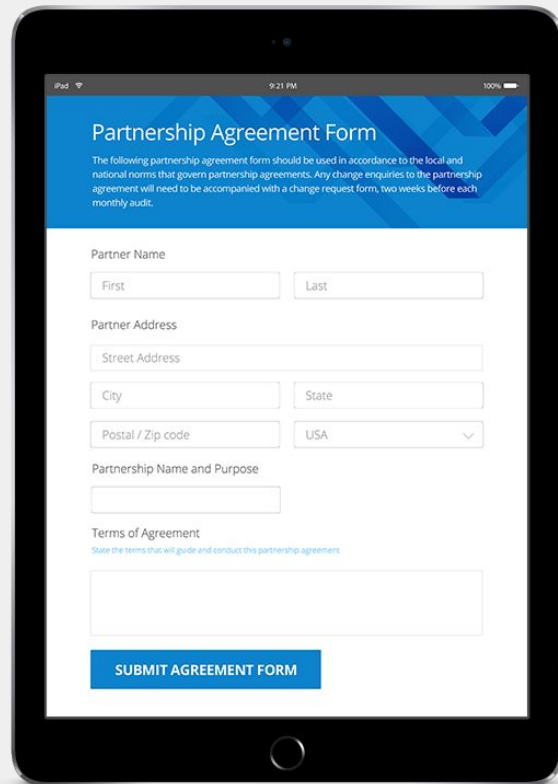

☐ I already registered and need to pay the difference

123ContactForm

Founded in 2008, in Timisoara, Romania, 123ContactForm is among the 5 top form builders in the world used by a wide diversity of businesses and institutions.

123ContactForm is a trustworthy and user-friendly web form builder that allows organizations to easily and securely build and customize forms or surveys without programming skills.

The solution simplifies lead collection and administration via contact forms, lead generation forms, surveys, event registration forms and many other types. It integrates with many third party apps, such as Google Drive, Salesforce, MailChimp, PayPal, Stripe and many more. Additionally, it provides full security through antispam protection, data recovery, virus and malware protection, HTTPS connection on sign up, Backups and SSL Encryption.

The image shows a tablet displaying a web form titled "Partnership Agreement Form". The form is set against a blue header with a geometric pattern. Below the header, there is a paragraph of text explaining the form's purpose. The form fields include:

- Partner Name:** Two input fields labeled "First" and "Last".
- Partner Address:** Four input fields labeled "Street Address", "City", "State", and "Postal / Zip code". A dropdown menu for "USA" is also present.
- Partnership Name and Purpose:** A single input field.
- Terms of Agreement:** A single input field with a small text prompt below it: "State the terms that will guide and conduct this partnership agreement".
- Submit Button:** A blue button labeled "SUBMIT AGREEMENT FORM".
